

2024 MEDICAL RESEARCH INNOVATION CONFERENCE

Tangalooma Island Resort, Moreton Island, QLD

"Research with Purpose 2024"

The Conference will explore strategies and solutions to help build, support and grow the biomedical innovation sector in Australia by attracting investments and creating collaborations that help advance innovations – ultimately leading to better health outcomes for the community.

The unique networking, educational and thought leadership event brings together experts and key decision makers from various relevant sectors to help up-skill delegates and explore how financial and social investments in medical research, together with different strategies and bold actions, can lead to the advancement of innovations.

The program focuses on building a culture, support and funding ecosystem where industry, government, academia, venture capital and philanthropy intersect to support biomedical innovations from beginning to end.
