

# National Foundation for Medical Research and Innovation

## NFMRI's 2022 Funding Opportunities

The National Foundation for Medical Research and Innovation (NFMRI), together with The Mason Foundation (managed by [Equity Trustees](#)), are pleased to announce the following 2022 funding opportunities below.

As you may be aware, NFMRI seeks to strategically support biomedical research into potential new drugs, medicines, tools, diagnostics, vaccines and devices. Our targeted support enables research to cross what is often referred to as the 'valley of death' and advance towards attracting the next-step partner on the translation pathway.

Those interested in applying for funding should read more about our [strategy](#) and [portfolios](#) prior to making a submission. Our [success stories](#) and [current research](#) also provide a good indication as to the types of projects we normally support and most common questions are addressed in our [FAQs](#) section.

Should applicants have any additional questions, NFMRI is holding an online grant round Q&A session from 2pm-3pm and from 3.30pm-4.30pm AEDT on Monday, 21 February 2022. [Register here](#).

# NFMRI 2022 Funding Opportunities

## 1. NFMRI General Grant Round - OPEN

Applications for innovations across all diseases and conditions are sought from Australian publicly funded research organisations.

**Focus:** Open nationally across all diseases and conditions affecting humans. Applications that fall within portfolios 2 & 3 only. More information about this grant round, including the EOI form, can be found [here](#).

**Closing date: 6pm AEDT on Monday, 21 March 2022**

## 2. Alzheimer's Disease Grant Round

As part of our partnership with The Mason Foundation (managed by Equity Trustees), NFMRI is seeking EOIs for Alzheimer's disease research projects. We strongly encourage women to apply and for the researcher leading the project day-to-day to be listed as the Chief Investigator, including mid-career researchers.

**Focus:** Alzheimer's disease applications that fall within portfolios 1, 2 & 3 (preference for 2 & 3), open nationally. More information about this grant round, including forms, once available, can be found [here](#).

**Closing date: 6pm AEDT on Monday, 21 March 2022**

**Special thanks to our generous partner:**

## 3. 2023 Dr John Dixon Hughes OAM Medal for Medical Research

## Innovation - Nominations now open

*NFMRI offers the Dr John Dixon Hughes Medal every two years to a researcher under the age of 45 for outstanding contribution towards the development and advancement of a biomedical innovation related to the nature, prevention, diagnosis, treatment and incidence of disease and other health problems that have a significant impact on the health of humans.*

Self-nominations are not accepted. The nominee must be under the age of 45 as at 1 October 2022. Nominations must be for an individual rather than a team.

Nominations close at **6pm AEST on Friday, 20 May 2022**

More information, including the nomination form, is available on our [website here](#)

## Research with Purpose 2022 Conference

### The Anchorage Hotel & Spa, Port Stephens, NSW

Our fifth conference will take place on the 22nd- 24th of November 2022 at [The Anchorage Hotel & Spa](#) in Port Stephens, NSW (approximately 90 minutes

[Anchorage Hotel & Spa](#) in Port Stephens, NSW (approximately 30 minutes from Newcastle).

To make it easier for delegates travelling from interstate and to suit various travel itineraries, the conference will commence later in the afternoon on the 22nd of November 2022 and will conclude mid-afternoon on the 24th of November 2022.

Over the coming months, more information about the program, speakers and registrations will be announced on our website.

---

## Partnering with NFMRI

NFMRI is always happy to consider partnership opportunities with other foundations, trusts, organisations or individuals looking to support innovative medical research in Australia and achieve greater outcomes from their funding. We are able to work within the disease and geographic parameters of our partners to collectively support new programs focussing on translation. This can better enable academic research outcomes, discoveries and innovations to move beyond academia and attract next stage partners including government, industry and venture capital. These partners have the expertise, capability and capacity to take research to the next stage, navigate the complex regulatory and approval systems and enable access to those in the community who are in need sooner.

NATIONAL FOUNDATION FOR MEDICAL RESEARCH AND INNOVATION

## Partnering for success

NFMRI partners with funders of medical research to create impact

Supporting Medical Research  
Advancing Innovation  
Enabling Collaboration

**Professor Janet Davies**  
"NFMRI can foster a culture that enhances commercial uptake of our biomedical innovations, mentor academic inventors and facilitate connections between academia, philanthropy and commercial sectors"

### A focus on creating impact

NFMRI partners with other funders, applying its strategy, systems, networks and expertise to achieve common goals.

Founded in 1977 and with DGR1 status the National Foundation for Medical Research and Innovation (NFMRI) has an established partnering program assisting other funders of medical research achieve better outcomes.

Supporting medical research that is important in the translation of discoveries leading to new innovations including; medicines, vaccines, diagnostics, devices, biologics and tools NFMRI has built specific expertise, capability and capacity that has enabled success.

Through our partnering program NFMRI is collaborating with other funders to achieve our missions.

[Contact us](#) to learn more and enquire about how we can work together.

**A. Prof Bernard Flynn**  
"NFMRI provides critical assistance to researchers in bridging the 'valley of death' that separates basic science from viable therapies"

NFMRI focuses strictly on supporting early stage biomedical innovations (drugs, vaccines, devices, diagnostics, biologicals and tools) advancements to cross the 'valley of death'. Our processes, systems capability and capacity have been purpose built to support a unique strategy and deliver impact by assisting publicly funded research organisations to attract next stage partners along the innovation pathway.

This strategy and support has already prevented a number of research projects from withering-on-the-vine. These projects have attracted next stage partners, secured investment and entered clinical trials across a number of diseases and innovations.

Based upon a framework of good governance, scalable systems and reproducible evidence of success, NFMRI established a targeted partnering program to assist other well-governed funders of research access our capability and capacity. Every dollar put towards our partnerships is distributed to innovative projects that meet the objectives of both NFMRI and the partner.

If your organisation would like to discuss a potential partnership further, please don't hesitate to contact Dr Noel Chambers by emailing [enquiries@nfmri.org.au](mailto:enquiries@nfmri.org.au)
