

“Solving the wicked problem of the gap from research to translation”

Learn about NFMRI’s strategy, grants and processes. With a focus on supporting translation across the ‘valley of death’, NFMRI CEO, Dr. Noel Chambers will explain how research applicants can increase their chances of success when applying for NFMRI support.

DR. NOEL CHAMBERS

CEO, National Foundation for Medical Research and Innovation

This is an interactive presentation which explores current philanthropic giving/culture and expectations.

It will address early translational research pathways, gaps and how NFMRI’s strategy supports preclinical research to become attractive and competitive when seeking next-step partners that can bring your innovations to communities in need.

More than 69% of projects supported by NFMRI have found next-step partners

PRESENTATION:

Date: 17 February 2026
