
Register now: NFMRI's 2022 Conference

[View this email in your browser](#)

National Foundation for Medical Research and Innovation

**Last chance to join us next week for
"Research with Purpose 2022"**

**Registrations for our upcoming conference will be closing this weekend,
[register now](#) so you don't miss out!**

NFMRI's fifth conference, Research with Purpose 2022, is taking place on the 22nd-24th of November 2022 at [The Anchorage Hotel & Spa](#) in Port Stephens.

New South Wales (approximately 30 minutes from Newcastle).

Not only will you hear from some of Australia's expert leaders in the research translation & funding space, due to the size and nature of our event you will leave having built some stronger networks and connections.

More information about our significantly discounted [accommodation rates](#), [speaker profiles](#) and [registration terms and conditions](#) are available on our website.

SPONSORSHIP OPPORTUNITY

THE ANCHORAGE - PORT STEPHENS, NSW

22-24 NOVEMBER 2022

Medical Research & Innovation Conference "Research with Purpose 2022"

Our purpose is our "why". It guides our activities, strategies and intent. For many organisations, including charities, purpose relates to delivering better health outcomes for the community. The biggest funder of health and medical research in Australia is the NHMRC, which is also funded by the community through taxes. When asked, the general public believes that medical research should be funded because it helps save lives, improve health outcomes, find cures and treatments for diseases.

The Intent is clear and consistent.

However, is our community's intent currently aligned with and being met by the medical research sector?

By accepting funding is there a social contract to prioritise intent?

This year's conference will explore benefits, harm and wastage in the medical research ecosystem and how together we can lead cultural and systems change in order to do better. It will also focus on ways the sector can improve efficiencies and communication with various stakeholders, including the general community. Because success relies on harnessing many skills sets across various sectors including research, industry, investors, government and philanthropy, the conference will focus on the role each of these play in achieving outcomes.

NFMRI Funding Opportunities

We strongly encourage women to apply and for the researcher leading the project day to day to be listed as the chief investigator, including mid career

project day-to-day to be listed as the chief investigator, including mid-career researchers. The focus of our reviews will be on the innovation and its potential of successfully securing the relevant next-step partner.

Ongoing Alzheimer's Disease Grant Round

Nationally across all three portfolios, preference for projects that fall within portfolios 2 & 3

next EOI cut-off date: 6pm on Thursday, 23 March 2023

Funding generously provided thanks to [The Mason Foundation \(managed by Equity Trustees\)](#).

More information, including forms, is available on our website [here](#).

2023 General Grant Round

Opens on 9 January 2023

Nationally, across all diseases and conditions across portfolios 2 and 3 only

More information is available on our website [here](#).

Partnering with NFMRI

NFMRI is always happy to consider partnership opportunities with other foundations, trusts, organisations or individuals looking to support innovative medical research in Australia and achieve greater outcomes from their funding. We are able to work within the disease and geographic parameters of our partners to collectively support new programs focussing on translation. This can better enable academic research outcomes, discoveries and innovations to move beyond academia and attract next stage partners including government, industry and venture capital. These partners have the expertise, capability and capacity to take research to the next stage, navigate the complex regulatory and approval systems and enable access to those in the community who are in need sooner.

NFMRI partners with other funders, applying its strategy, systems, networks and expertise to achieve common goals.

Founded in 1977 and with DGR1 status the National Foundation for Medical Research and Innovation (NFMRI) has an established partnering program assisting other funders of medical research achieve better outcomes.

Supporting medical research that is important in the translation of discoveries leading to new innovations including; medicines, vaccines, diagnostics, devices, biologics and tools NFMRI has built specific expertise, capability and capacity that has enabled success.

Through our partnering program NFMRI is collaborating with other funders to achieve our missions.

nfmri.org.au enquiries@nfmri.org.au

NFMRI focuses strictly on supporting early stage biomedical innovations (drugs, vaccines, devices, diagnostics, biologicals and tools) advancements to cross the 'valley of death'. Our processes, systems capability and capacity have been purpose built to support a unique strategy and deliver impact by assisting publicly funded research organisations to attract next stage partners along the innovation pathway.

This strategy and support has already prevented a number of research projects from withering-on-the-vine. These projects have attracted next stage partners, secured investment and entered clinical trials across a number of diseases and innovations.

Based upon a framework of good governance, scalable systems and reproducible evidence of success, NFMRI established a targeted partnering program to assist other well-governed funders of research access our capability and capacity. Every dollar put towards our partnerships is distributed to innovative projects that meet the objectives of both NFMRI and the partner.

If your organisation would like to discuss a potential partnership further, please don't hesitate to contact Dr Noel Chambers by emailing enquiries@nfmri.org.au
