National Foundation for Medical Research and Innovation

REMINDER: Alzheimer's Disease Grant Round Closing Soon

We wish to remind all applicants that our Alzheimer's disease grant round will be closing soon at **6pm AEDT on Thursday, 14 October 2021**.

As you may be aware, NFMRI seeks to strategically support biomedical research into potential new drugs, medicines, tools, diagnostics, vaccines and devices. Our targeted support enables research to cross what is often referred to as the 'valley of death' and advance towards attracting the next-step partner on the translation pathway.

Those interested in applying for funding should read more about our [strategy](#) and [portfolios](#) prior to making a submission. Our [success stories](#) and [current research](#) also provide a good indication as to the types of projects we normally support. Please note that NFMRI does not stipulate minimum or maximum funding request amounts. We recommend that researchers apply for exactly what they require to deliver the project successfully. We also do not partially fund projects.

Those interested in current and future funding opportunities should consider [subscribing to our newsletter](#) as this is where all announcements are

made.

2021-22 Funding Opportunities

1. Alzheimer's Disease Grant Round - closing at 6pm AEDT on Thursday, 14 October 2021

As part of our partnership with The Mason Foundation (managed by Equity Trustees), NFMRI is seeking EOIs for research projects into Alzheimer's disease.

Focus: Alzheimer's disease applications that fall within portfolios 1, 2 & 3 (preference for 2 & 3), open nationally. More information about this grant round, including forms, can be found [here](#).

Should you miss this cut-off date, the next cut-off date for Alzheimer's disease EOIs will be 21 March 2022. Additional cut-off dates will be subject to funding availability.

2. NFMRI General Grant Round - opens on 27 January 2022 and closes on 21 March 2022

Expressions of interest for our general grant round will be opening on 27 January 2022. Applications for innovations across all diseases and conditions will be accepted from Australian publicly funded research organisations.

Focus: Open nationally across all diseases and conditions affecting humans. Applications that fall within portfolios 2 & 3 only. More information about this grant round can be found [here](#). Please note that EOI forms for our general grant round will only be made available from the 27th January 2022.

Special thanks to our generous partners:

As part of our grants program, we deliver presentations at publicly funded research organisations to educate researchers around translation and to address some of the factors that will increase their chances of success when applying for grants.

Should your institution wish to host a seminar in the coming months, COVID permitting, you may submit a request for Dr Noel Chambers to present using this [online form](#). Please bear in mind that we require suitable numbers to justify our travels (40 or so) and the session would require a minimum of an hour in order to be able to get the message out effectively and to help address the questions from the audience.

Partnering with NFMRI

NFMRI is always happy to consider partnership opportunities with other foundations, trusts, organisations or individuals looking to support innovative medical research in Australia and achieve greater outcomes from their funding. We are able to work within the disease and geographic parameters of our partners to collectively support new programs focussing on translation. This can better enable academic research outcomes, discoveries and innovations to move beyond academia and attract next stage partners including government, industry and venture capital. These partners have the expertise, capability and capacity to take research to the next stage, navigate the complex regulatory and approval systems and enable access to those in the community who are in need sooner.

**Supporting Medical Research
Advancing Innovation
Enabling Collaboration**

A focus on creating impact
NFMRI partners with other funders, applying its strategy, systems, networks and expertise to achieve common goals.

Founded in 1977 and with DGR1 status the National Foundation for Medical Research and Innovation (NFMRI) has an established partnering program assisting other funders of medical research achieve better outcomes.

Supporting medical research that is important in the translation of discoveries leading to new innovations including: medicines, vaccines, diagnostics, devices, biologics and tools NFMRI has built specific expertise, capability and capacity that has enabled success.

Through our partnering program NFMRI is collaborating with other funders to achieve our missions.

[Contact us](#) to learn more and enquire about how we can work together.

Professor Janet Davies
"NFMRI can foster a culture that enhances commercial uptake of our biomedical innovations, mentor academic inventors and facilitate connections between academia, philanthropy and commercial sectors"

A.Prof Bernard Flynn
"NFMRI provides critical assistance to researchers in bridging the 'valley of death' that separates basic science from viable therapies"

1 GOVERNANCE Strong governance forms the foundation of what we do, our culture and our partnerships.	2 STRATEGY Our strategy focuses on targeted support that addresses gaps to enable translation.	3 SYSTEMS NFMRI has built bespoke scalable systems and capability specific to our strategy.	4 TRACK RECORD Proven track record of success with breadth and depth across diseases and innovations.

nfmri.org.au enquiries@nfmri.org.au

NFMRI focuses strictly on supporting early stage biomedical innovations (drugs, vaccines, devices, diagnostics, biologicals and tools) advancements to cross the 'valley of death'. Our processes, systems capability and capacity have been purpose built to support a unique strategy and deliver impact by assisting publicly funded research organisations to attract next stage partners along the innovation pathway.

This strategy and support has already prevented a number of research projects from withering-on-the-vine. These projects have attracted next stage partners, secured investment and entered clinical trials across a number of diseases and innovations.

Based upon a framework of good governance, scalable systems and reproducible evidence of success, NFMRI established a targeted partnering program to assist other well-governed funders of research access our capability and capacity. Every dollar put towards our partnerships is distributed to innovative projects that meet the objectives of both NFMRI and the partner.

If your organisation would like to discuss a potential partnership further, please don't hesitate to contact Dr Noel Chambers by emailing enquiries@nfmri.org.au

Upcoming Events

12pm AEDT, 27 October 2021 - [Australasian Research Management Society](#):
Supporting research across the 'valley of death', NFMRI's strategy impact results

22-24 November 2022 - [NFMRI Conference "Research with Purpose 2022"](#) -
The Anchorage Hotel & Spa, Port Stephens NSW
